

"With these budget crunches, we can't afford to buy a new transformer."

"So what can we do when we have a transformer failure?"

GET IT REPAIRED IN 1-3 WEEKS!

Save time. Save money. Save yourself a headache.

Before

After

Top Reasons To Have Your Transformer Repaired

- ✓ 1. **Avoid Delays** - Industry average shipping time on new transformers is 8-10 weeks. We can have your transformer repaired in *as little as 4-5 days*. Standard lead time is just 2-3 weeks.
- ✓ 2. **Avoid High Replacement Costs** - In most cases, tanks, enclosures, cores and bus can be reused while the working part of your transformer, the coils, are replaced. This translates into significant savings over buying a new transformer.
- ✓ 3. **Avoid High Energy Costs** - Older transformer designs are not as efficient as newer ones. When possible, we will redesign the coils to provide greater short-circuit strength and reduced operating costs.
- ✓ 4. **Avoid Hassles** - Finding a transformer can be a big headache. If you do, will it fit, or will you have to make major modifications to make it work? You know that your transformer will fit into the existing space and will connect without any hassles.

Sales. Repair. Rental.

Fast. Reliable. Guaranteed.
